Subject: Brown Bag Announcement for 9 March 2011
Attachments: image001.jpg

Hello Chapter Chairs,
Please feel free to disseminate to your members so they can attend the free online virtual training.

Privacy and security aren't what they used to be. With advancements in technology, enhanced GPS capabilities and smartphones with built-in GPS, managing privacy and security is a fulltime job. It is critical that we understand what kind of data can be broadcast and what we can do to protect ourselves, our families and our companies.

Geotagging adds geographical identification to photographs, video, websites and SMS messages. It's the equivalent of adding a 10-digit grid coordinate to everything posted on the internet allowing random people to track an individual's location.

Join us on 9 March 2011 as Mark Whitteker, CISCO Government Security Office will discuss the dangers of Geotagging and how to protect yourself and your company from it.

Registration runs through noon, 2 March 2011.

Go to <http://9march2011brownbagncms.eventbrite.com> to register.
